

ACOUSTIC NEUROMA RECOVERY PROGRAM

**IN 14 WEEKS, YOUR BALANCE & DIZZINESS
CAN BE SIGNIFICANTLY IMPROVED**

INITIAL ASSESSMENT 1:1

An Acoustic Neuroma (AN) growing on the vestibulocochlear nerve can have a significant impact on your hearing, balance & dizziness. Whilst the impact on your hearing maybe be ongoing, the symptoms of balance, vertigo & dizziness can be markedly improved with this Recovery Program.

8 TREATMENT SESSIONS 4 WEEKLY SESSIONS 4 FORTNIGHTLY SESSIONS

This 14 Week AN Recovery Program is designed reduce your symptoms of dizziness and improve your confidence with moving again. There is strong evidence that vestibular rehabilitation is essential for AN recovery, regardless of whether you're pre or post surgery, or managing conservatively. If you're experiencing these symptoms, our AN Recovery Program could have a huge impact on improving your life.

AN EDUCATION SESSION REGULARLY AVAILABLE FOR DISCUSSION, ADVICE AND EDUCATION AS REQUIRED

FINAL REVIEW 1:1
